

## Free Private Jet Flight Program a Great Success

(Los Angeles, CA) ElJet Aviation Services celebrated the completion of one year since the launch of the YourTrip program, the only program in the world to offer free private jet flights. The idea is simple: When empty legs are not sold, ElJet offers them to customers for free.

"In a slowing economy, our clients are continuously looking for value. They are finding that ElJet provides not only exceptional pricing on traditional and empty leg flights, but also occasional free flights. It is icing on the cake," said Ben Schusterman, Vice President of Operations for ElJet.

Recent free flights included a round trip on a Heavy Jet (Gulfstream III) from Van Nuys (VNY) to Houston (HOU) and a round trip from Santa Monica (SMO) to the Bay area. Free flights may range from short one-way itineraries to international trips.

Roberta Latham, a senior Travel Portfolio Manager at ElJet, said, "I think the biggest draw of the program is that free flights are available not only to paying members, but also to the general public, wherever in the world they may be."

While Diamond Members and Platinum Members are offered free flights before the general public, anyone can subscribe at no charge to be notified of the free flights that remain available.
